

**IN THE CLAIMS:**

Please amend claim 1 as follows:

**LISTING OF CURRENT CLAIMS**

Claim 1. (Currently Amended) A light bulb structure comprising:

a closed bulb receiving therein two magnesium wires connected with each other via a tungsten filament and an insulator connected to each of the two magnesium wires for separating the two magnesium wires, wherein the two magnesium wires extends out of the bulb;

~~a closed lamp shade enclosing therein the bulb and allowing an extension of~~  
integrally formed with the bulb enclosing the bulb therein and having the two  
~~magnesium wires out of the lamp shade; extending outwardly therefrom; and~~

a mounting base securely connected to a bottom of the lamp shade and  
allowing the two magnesium wires to extend out of the mounting base.

Claim 2. (Original) The light bulb structure as claimed in claim 1, wherein the mounting base has a passage correspond to the two magnesium wires such that the two magnesium wires are able to extend out of the mounting base.
